PROGRAM COSTS

The MoSCORES (Missouri School Credentials or Occupations Resulting in Employment Success) tool is a college scorecard that provides information on academic program outcomes and costs. Data is reported in aggregate and is gathered from de-identified students who have completed academic programs and are working in Missouri. It is designed to provide students with a better understanding of training options and typical work outcomes for graduates of specific academic programs. Please visit here (https://scorecard.mo.gov/scorecard/) for more information.
